Lean Transformation for Medical Device Development and Manufacturing

Join your peers at the educational MD&M West Conference and attend the highly informative and practical workshop on “Lean Transformation for Medical Device Development and Manufacturing” scheduled for Feb 11th, 2:45pm – 4:00pm at the Anaheim Convention Center, California.

This workshop will cover:

- Identifying why most lean programs fail to produce lasting results
- Explaining why a lean transformation model should be based on Key Process Indicators (KPI) and Key Behavioral Indicators (KBI)
- Exploring how strategy deployment and A-3 thinking can be used to cascade metrics and goals down to the front lines
- Explaining how to operationalize lean daily management and daily Kaizen using A-3 and the Improvement Kata

Darren Dolcemascolo, Senior Partner, **EMS Consulting Group**

Ken Flaherty, Lead Lean Transformation Consultant, **EMS Consulting Group**

Workshop leaders' biographies

Darren Dolcemascolo, Senior Partner, **EMS Consulting Group**

Darren Dolcemascolo is an internationally recognized lecturer, author, and consultant. As Sr. Partner and co-founder of EMS Consulting Group, he specializes in the application of Lean strategies in medical device, biotech, healthcare, manufacturing, and technology environments. Some of the clients for whom he has worked include Covidien, DirecTV, Edwards Lifesciences, Hologic, Inland Empire Health Plan, Optum Healthcare, Qualcomm, Teledyne, and Zimmer. In addition to working directly with clients, Mr. Dolcemascolo teaches Lean workshops and certification programs in Southern California. Darren has a BS in Industrial Engineering from Columbia University and an MBA from San Diego State University.

Ken Flaherty, Lead Lean Transformation Consultant, **EMS Consulting Group**

Ken Flaherty is a Senior Lean Transformation Consultant with over 20 years of experience. He has leveraged his expertise in Lean Six Sigma methodologies to drive continuous improvement, process optimization, and multimillion-dollar savings in multiple industries. Ken holds an MS in Logistics & Supply Chain Management, an MS in Business Management & Human Resources, and a BS in Workforce Organizational Development. He is a Certified Master Black Belt in Lean Six Sigma and is also certified in Project Management and Jonah Theory of Constraints.
